Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. They turn round what you say and throw it back at you as questions, but you don't hear it that way. You think they're telling you something that they're not." That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously..to The Amber Spyglass, are never eviscerated, decapitated, torn limb from limb, and immolated?which. Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new

Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking. Colman grinned faintly and gestured across the room. "The same one that brought you Veronica and Celia." "Bad?" she asked, glancing toward Laura's room. "Must be clotting ahead of them." "I don't know," Jay said. "It's a lot to go into now, but we're certain they've got the capability. It's really that urgent, Steve. When can you get over?" cue from him, the dog slows to a trot, then lowers its head and slinks forward at his side, more like a cat. "I'm not sure that I agree as much as I thought," Kalens told him. "Stern may have a point. We should try it his way to begin with at least. We don't have to stick with the plan indefinitely." The dog's tail wags, brushing Curtis's legs, either because she catches an appealing scent or because she. What was going through her mind didn't hit Colman until over an hour later when he was inside a maglev car heading back to Canaveral, with the bleak prospect before him of snatching maybe an hour of sleep at most before going on duty before dawn with a hard day ahead. Discreet, this weeping. The plate of homemade lasagna blurred in front of her, and hot tears slid down. "That's up to them. If it pleases them to say so, why should we mind?" Although the blessed gloom provided emotional cover, Geneva didn't look at Micky. She stared at the. Pocketing his keys, he walked away, past modest ranch-style houses with neatly trimmed lawns and. "Well . . . yeah. Who knows? He was about to say something more when Wellington interrupted. "That's a personal question, Jay," Bernard cautioned. "Anyhow, it's early yet." The Medichironian Sea extended from the cool temperate southerly climatic band to the warm, subequatorial latitudes at its mouth. Its eastern shore lay along narrow coastal plains, open in some parts and thickly forested in others, that rapidly rose into the foothills of the Great Barrier Chin, beyond which stretched the vast plains and deserts of central Oriena. The opposite shore of the sea opened more easily into Occidena for most of its length, but the lowlands to the west were divided into two large basins by an eastward-running mountain range. An extension of this range projected into the sea as a rocky spine of fold valleys fringed by picturesque green plains, sandy bays, and rugged headlands, and was known as the Mandel Peninsula, after a well-known statesman of the 2010s. It was on the northern shore of the base of this peninsula that the Kuan-yin's robots had selected the site for Franklin, the first surface base to be constructed while the earliest Chironians were still in their infancy aboard the orbiting mother-ship. By midmorning Terran newscasters were interpreting the development as a Chironian backlash to the Padawski outrages and as a warning to the Terrans of what to expect if Kalens was elected to head the next administration after his latest public pledge to impose Terran law on Franklin as a first step toward "restabilizing" the planet. Interviews in which Chironians denied, dispassionately and without embellishment, that they had had anything to do with the incidents were given scant coverage. Reactions among the Terrans were mixed. At one extreme were the protest meetings and anti-Chironian demonstrations, which in some cases got out of hand and led to mob attacks on Chironians and Chironian property. At the other, a group of two hundred Terrans who believed the bombings to have been the work of the Terran anti-Chironian extremists announced that they were leaving en masse and had to be stopped by a cordon of troops. Before they could disperse they were attacked by an inflamed group of anti-Chironians, and in the ensuing brawl the Chironians looked on as impassive spectators while Terrans battled Terrans, and Terran troops in riot gear tried to separate them. that Luki and the compassionate spacemen were sending her subliminal messages in reruns of Seinfeld, in. "Tell the men to stand down," he said quietly to Jarvis. "Deprieme the intruder systems and revert the lock to condition green. Move everybody forward to the outer lock and deploy to secure against attack from the Battle Module. Chaurez, get those men down there inside. We're going to need all the help we can get." With that he turned and strode out of the observation room to descend to the lock below. Bret Hanlon held up a hand protectively. It was a pinkish, meaty hand with a thin mat of golden hair on the back, the kind that looked as if it could crush coconuts, and matched the solid, stocky build, ruddy complexion, and piercing blue eyes that came with his Irish ancestry. "Don't look at me," he said. "I'm contracted now, all nice and respectable. That's the fella you should be making eyes at." He nodded toward Colman and grinned mischievously. "I don't know. We haven't tried it yet," Bernard answered. He raised his voice a fraction. "Anybody home? What do we have to do to get a computer in this place?" No response. "Sure... thanks." The two Chironians frowned at each other. "Owns it?" Juanita repeated. Her voice suggested that the notion was a new one. "I'm not all that sure what you mean.
